## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to the gas nozzle of the welding torch.

Group II, claim(s) 5-18, drawn to the cleaning device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. There is not a special technical feature common to all groups that make a contribution over the prior art. The gas nozzle and/or the nozzle assembly and/or the contact tube has/have an artificially produced patina layer at least or partial area of its surface is known in the art, as can be seen in the example found in Kim (US Pat. No. 5,618,456).

4. Furthermore, the special technical feature of Group I, the gas nozzle and/or the nozzle assembly and/or the contact tube are made of copper or copper alloy and has/have an artificially produced patina layer at least or partial area of the surface is not shared in Group II. The special technical feature of Group II, a cleaning device which

Art Unit: 4118

includes a brush; the bristles are made of a very soft elastic material and an abrasive grains are embedded in said bristles, is not shared by Group I. Therefore, the respective groups lack the same or corresponding special technical features and do not relate to a general inventive concept.

5. A telephone call was made to Mr. Dorchak on 11/13/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
